Stocks of Grains

in All Positions

April 25, 1960

FEED GRAINS AND WHEAT STOCKS CONTINUE RECORD LEVEL

April 1 stocks of feed grains--corn, oats, barley, and sorghum grain-- totaled 130 million tons, a tenth larger than the previous record in storage April 1, 1959. Stocks of corn led the increase with 3,407 million bushels in all storage positions followed by a record 746 million bushels of sorghum grain, more than offsetting reduced holdings of oats and barley. Wheat stocks moved to a new April 1 record high of 1,564 million bushels but rye stocks shrank to the relatively low level of 13.8 million bushels. Soybeans continued at a high level with 310 million bushels held in all storage positions but flaxseed holdings of 10.2 million bushels were a record low for the date.

Stocks of 1,564 million bushels of wheat stored in all positions on April 1 were the largest of record for that date, one percent larger than the previous year and two-thirds above average. Current stocks were less than January 1, 1960 stocks by 314 million bushels. Off-farm stocks of 1,358 million bushels were the largest of record and 8 percent above the previous year as terminal and interior mill, elevator, and warehouse stocks rose to record levels. Wheat either owned by or under Government loan represented about 85 percent of the total stocks in all positions.

Rye stocks of 13.8 million bushels stored in all positions April 1 were almost a fourth below the relatively large stocks a year earlier and 4 percent below average. Stocks on farms and in interior mills, elevators and warehouses were below April 1, 1959 while terminal and CCC bin stocks were larger. Farm stocks at 5 million bushels were nearly a half smaller than last year and 9 percent below average. Stocks in interior mills, elevators, and warehouses were a fourth smaller than a year earlier but 4 percent above average. Terminal stocks were two-fifths above a year ago and the largest since 1955.

Corn stocks of 3,407 million bushels in all storage positions on April 1 set a new record high for the date. Stocks in interior mills, elevators, and warehouses, at 633 million bushels, were nearly a third larger than a year ago. Corn in terminals and CCC-owned bins totaled 686 million bushels, about the same as a year earlier. Total stocks in off-farm positions amounted to 1,319 million bushels of which about 93 percent was either owned by or under loan to the Government. Stocks on farms of 2,088 million bushels were 15 percent above the previous record of 1,818 million bushels on April 1, 1959. Of the farm stocks on April 1, 1960, 26 percent was under CCC loan compared with 25 percent a year ago. Disappearance from all storage positions during the January-March quarter

was a record 1,049 million bushels and compares with a 933 million-bushel disappearance during the same period last year.

Oats stored in all positions totaled 488 million bushels--about a fourth less than the record holdings a year ago and an eighth below average. Farm, terminal and mill, elevator and warehouse stocks were all well below a year ago. Oats under loan to or owned by the CCC amounted to only 12 percent of the total stocks compared with 17 percent a year earlier. Disappearance of oats during the first 3 months of 1960 amounted to 287 million bushels--a fourth less than in the same quarter in 1959.

Barley stocks in all positions on April 1, at 244 million bushels, were 46 million bushels below the record holdings of a year earlier. Farm stocks were estimated at 121 million bushels--22 percent less than a year earlier but nearly a fourth above average. Stocks in off-farm storage were 10 percent smaller than a year ago. About 49 percent of the April 1 stocks were under loan to or owned by CCC compared with about 60 percent a year ago. Disappearance from all storage positions during the January-March quarter was 117 million bushels compared with 103 million for the same period a year earlier.

Sorghum Grain stocks in all positions on April 1, at 746 million bushels, were a record high for the date and 22 percent above a year earlier. Stocks in off-farm positions totaled 637 million bushels--25 percent more than the record off-farm holdings of a year ago. Farm stocks at 109 million bushels were 9 million above a year earlier. Four-fifths of the total stocks on April 1 were under loan to or owned by CCC. Disappearance from all storage positions during the January-March quarter was 128 million bushels compared with 107 million during the same quarter in 1959.

Flaxseed stocks in all storage positions on April 1 totaled 10.2 million bushels, less than half the stocks on hand a year earlier and the smallest stocks of record for that date. April 1 stocks indicate a disappearance during the period July 1959-March 1960 of 27.2 million bushels from a supply of 37.4 million bushels (carryover of 14.7 million plus 1959 production of 22.7 million bushels). During the period, crushings amounted to 19.5 million bushels and exports 7.1 million.

Soybean stocks of 310 million bushels in all storage positions on April 1 were the second largest of record for the date being exceeded only by the 324 million bushels on hand a year earlier. Farm and terminal stocks were higher than a year ago but these increases were more than offset by smaller stocks in interior mills, elevators, and warehouses, CCC bins and oilseed processing plants.

April 1 stocks indicate a disappearance during the 6 month period, October 1959-March 1960 of 290 million bushels from a supply of 600 million bushels (carryover of 62 million plus 1959 production of 538 million bushels). During the period known disappearance amounted to about 287 million bushels. Crushings (October-March) totaled 204 million bushels, about 6 million bushels of 1959 crop soybeans were crushed before October 1, 75 million bushels were exported and feed and loss were estimated at about 2 million bushels.

Stocks of grains, April 1, 1960 with comparisons

1/ Estimates of the Crop Reporting Board.

2/ Commercial stocks reported by Grain Division, AMS, at 44 Terminal cities.

3/ Owned by CCC and stored in bins or other storages owned or controlled by CCC; other CCC-owned grain is included in the estimates by positions.

4/ All off-farm storages not otherwise designated, including merchant mills.

5/ Not available for April 1 prior to 1957.

6/ Firms reporting crushings and stocks of soybeans to the Bureau of the Census.
